

WESS Environment Sustainability

WESS Environment team promotes and fosters passion and engagement with environmental issues in the school community. The team works from a student-driven approach to reduce waste and improve sustainability within the school.

Current Programs:

Student Leadership: First implemented formally in 2014. The Student Environment Captain represents the team at assemblies and provides a leading voice in the Student Environment Team.

Curriculum engagement: Embedding sustainability and environment design principles in appropriate parts of the curriculum. For instance: Year 4 Technology and Science projects.

Food waste worm composting: Vermiculture, soil improvement and packaging reduction.

Recycling and Paper waste reduction: In class recycling, monitoring school wide printing via the Papercut program.

Water Saving: Turning off bubblers and taps when not in use.

Energy Efficiency: Solar Power and Electricity Saving measures.
